

## ▼ Package Content

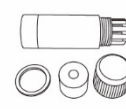

Camera

Quick Start

Screws & wall plugs

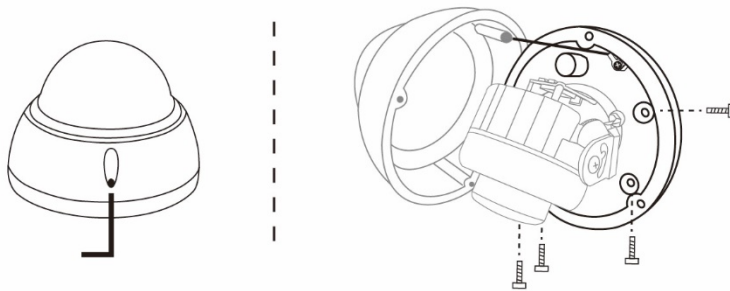

Waterproof plug kit

Star key wrench

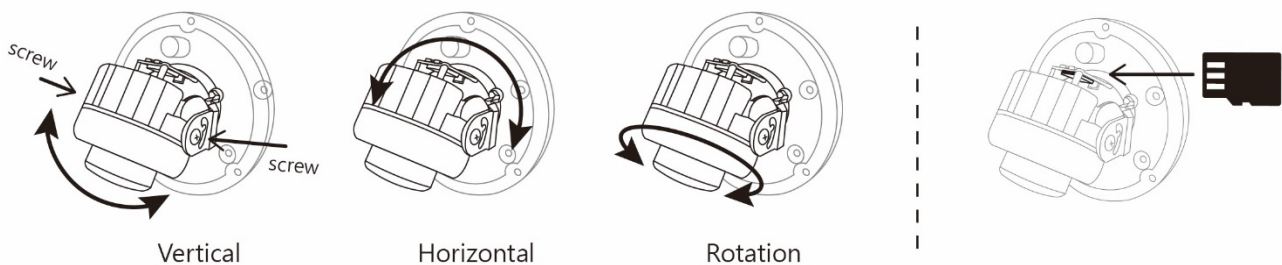

Step1: Find the star key wrench supplied in the sales package to open the dome cover.

Step2: Locate where to install this camera and fasten the camera to the ceiling or wall.

Step3: Loosen the screws as indicated below (if necessary) to adjust the viewing angle of the camera and fasten the screw to secure the angle.

Step4: (Available only when supported) Find the microSD card slot on the camera module as indicated below and insert a microSD card.

Step5: Replace the dome cover back. Make sure the rubber ring is well attached and fastened to ensure the water-proof function works normally.
